Filling up the boat with fuel in the morning can sometimes be messy. No matter how careful you are or how long you let the nozzle drip inside your tank, you almost always have a little bit trickle down the side of your boat. What might not seem like a big deal can turn into a problem in regard to the surface of your vessel - not to mention, it's not good for the environment.

The patented Chadd Padd is a new product that is sure to keep your boat clean. The pad is essentially a reusable mat that catches and contains fuel before it turns into a big problem. It's anti-static treated and can hold up to 4.5 oz of petroleum products. Reusing this product is no problem at all but when it is spent - it's fine to dispose of it as long as you follow the applicable regulations. For those who like multi-task tool, the Chadd Pad also can be used as a drip mat in the bilge before pump-out or when working with hydraulic fluid.

With a perforated, partial hole design, it accommodates most filler ports for refueling or adding oil. This simple but useful item is economically priced at \$9.95 or for a convenient 6-pack, a roll sells for \$34.95. For more information, visit www.chaddpadd.com
