ADVANCED REFUELING BIB PROTECTS BIKES, CARS AND ENVIRONMENT

By [woody](#)

Tuesday, August 31st, 2010

Annoying fuel burps or spills can harm paint, as well as cause pollution and dangerous situations, such as fires if gas drips on a hot [engine](#). Cleaning it up is another problem, since the insufficient, scratchy paper towels at the station hardly get the job done. The patented Chadd Padd® provides the perfect solution by catching and containing any spills or overages that may occur at the [pump](#). The industry's premier, disposable refueling bib protects motorcycle and car surfaces from hose and nozzle damage.

Originally designed for use on corporate jets, the waterproof Chadd Padd delivers 10" x 10" of fuel absorbing power. Made from clean, soft and absorbent polymers, it is anti-static treated and can hold up to 4.5 oz. of petroleum products.

The Chadd Padd can be used multiple times for a variety of applications. With a perforated, partial hole design, it accommodates most filler ports for refueling or adding oil. The pad can also be employed as a drip mat and is even disposable, in accordance with applicable regulations.

The economical Chadd Padd [retails](#) for just \$9.95 for a convenient 6-pack, while a roll of 36 10" x 10" pads is \$34.95. Enter promo code EZFUEL8 at www.chaddpadd.com to save 10%.

Completely customizable, garages and gas stations can also employ Chadd Padds as a proactive spill response solution and to promote their businesses. Saving fines and clean-up costs, the innovative mats can incorporate company names and graphics. The versatile pads can be placed in dispensers at the [pump](#), sold in stores or given away for local exposure.
